Update existing payslips from Excel

A quick tour for the saved batch and its linked Employee Master.

Reports > Payroll Reports > Excel Payslips

1 Open the saved month

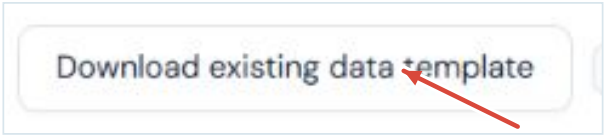

Select the client and saved salary batch.
Choose More > Update from Excel.

Choose the batch you want to update.

2 Download current data

Click Download existing data template.
Open the downloaded Excel file.

Your current values are prefilled

3 Edit only what is needed

Keep the original headers and employee codes.
Keep Client ID, Batch ID and month unchanged.

Employee code	Email (example)
SYN-001	new@example.test
SYN-002	(blank: keep current)

Save your edited file. Blank cells keep values.

4 Upload and preview

Browse your edited file and check mapping.
Then click Preview changes.

Check worksheet, header and employee-code field.

5 Review every difference

Check Current value, New value and Destination.
For a subset: Review selected changes again.

Illustrated review

Current	New
Not set	Updated detail

Destination: Batch + Master

Calculated impacts are shown for your review.

6 Confirm and save

Tick the review confirmation. Confirm zeros if shown, then click Save reviewed changes.

Illustrated controls

☑ Reviewed changes and calculated impacts

Save reviewed changes (3)

The confirmation reports updated Master records.

Same saved batch. No duplicate employees. Existing mail history stays.

Only fields marked Master update Master. Saving sends no email.
